Professional Summary

Computer Science enthusiast specializing in Python, Machine Learning, and Flask. Experienced in building data-driven applications and optimizing User Interface through internships and projects.

Education

B.Tech in Computer Science and Engineering, UPES, Dehradun, Uttarakhand | CGPA: 8.15/10 — Jul 2023 – Present
12th, CBSE, St Patrick's Senior Secondary School, Jaunpur, Uttar Pradesh | Percentage: 85.60% — Apr 2021 – Mar 2022
10th, CBSE, St Patrick's Senior Secondary School, Jaunpur, Uttar Pradesh | Percentage: 85.00% — Apr 2020 – Mar 2021

Technical Skills

- **Programming Languages:** Python, Java, C, JavaScript.
- **Frameworks & Libraries:** Scikit-learn, Flask, Pandas, NumPy.
- **Tools**: Git, GitHub, Power BI, MySQL.

Internships

- **SSP SOFT PRO INDIA PVT. LTD., Delhi | Software Development Intern** — Jun 2025 – Jul 2025
  Skills Learnt: User Interface Optimization, Software Testing
  Responsibilities:
  - Assisted in software development by debugging applications and optimizing UI components, improving application performance and reducing response time by ~20%.
  - Collaborated with cross-functional teams on testing, and feature refinement to streamline development workflows.

Projects

- **Spotify-Based Music Recommendation System** — Jul 2025
  Tech Stack: Python, Flask, Pandas, Scikit-learn, Spotify API, HTML, CSS, Jinja
  Description: Built a content-based music recommendation web application that suggests songs based on user preferences and similarity metrics.
  Contribution:
  - Implemented cosine similarity and Jaccard similarity with fuzzy matching to improve recommendation accuracy.
  - Integrated Spotify API to fetch real-time track metadata, album artwork, and preview links, enhancing user experience.

- **Crop Recommendation System** — Aug 2025
  Tech Stack: Python, Machine Learning
  Description: Developed a machine learning–based system to recommend optimal crops using soil and environmental data.
  Contribution:
  - Conducted data preprocessing and feature selection to optimize a machine learning–based crop recommendation system, achieving 92% prediction accuracy.
  - Applied rule-based and ML logic to support informed agricultural decision-making.

Certifications

- Deloitte Data Analytics Job Simulation – Forage. — Jun 2025
- SQL (Intermediate) – Hacker Rank. — Nov 2024
